SUBJECT INDEX

Acetylcholinesterase: effect of physostidonine, THA and LF-14 433
Acetylcholine nicotinic receptor: incorporation into liposomes 65
Acetylcholine release: effect of ω-conotoxin GVIA 49
effect of THA physostigmine and LF-14 433
nAChR: incorporation by the PEG precipitation procedure 66
nicotinic acetylcholine receptor 65
Acoustic stimulation: action on phosphoinositide breakdown 327
Adenosine: a homeostatic mediator 257
a modulator 249
and alcohol 254
and cognition and blood flow 255
and depression 254
and respiration 255
as anxiolytic compound 253
cardiovascular actions 255
in analgesia 254
in epilepsy 253
in immune function 256
in inflammation 254
in pulmonary function and asthma 256
renal effects 256
Adenosine actions: therapeutic implications 253
Adenosine antagonists 252
Adenosine A_2 receptors: in retina 419
involved in glycogen hydrolysis 419
Adenosine derivative: involvement in synaptic changes 309
Adenosine receptors: 250
linked to c-AMP formation 389
Adenylate cyclase: coupled to receptors in the retina 387
coupling with $GABA_B$ receptors 85
Adrenals: induction of tyrosine hydroxylase 199
α_2-Adrenergic receptors: of retina 413
interaction with *Conus* venom 413
Aganglionic colon: presence of neuropeptides 135
Alcohol: and adenosine 254
Allopurinol: effect on purine release 91
Alzheimer's disease: β-amyloid and DNAs 163
neurofibrillary tangles 121
Amino acid: uptake by CNS 235
Amino acids: uptake into brain slices 56
Amino acid transport: effect of caffeine 55
Amino acid uptake: concepts 235
effect of ions 235
Amitripyline: interaction with muscarinic receptors 447
Analgesia: involvement of adenosine 254
Anaesthesia: effect of brain glycogen 19
Anticonvulsant: diphenylhydantoin 353
Antisera: to MAO 321
Anxiolytic actions: of adenosine 253
Aristotle: work with electric organs 275
Asthma: and adenosine 256
Astrocytes: c-AMP dependent protein kinase 25
ATP: involvement in synaptic changes 309
Axonal transport: 289
involvement of cytoskeleton 293
properties 290

Baclofen: effect on adenylate cyclase 85
Bernstein: work with electric organs 275
Binding: of [^{3}H]glutamate 471
β-Amyloid cDNAs: cloned from Alzheimer's patient 163
β-Amyloid protein: cloned 163
Binding sites: by hemicholinium-3 211

Caffeine: effect on amino acid transport 55
Ca^{2+}-dependent release: of endogenous GABA 439
Ca^{2+} independent release: of endogenous GABA 439
Ca^{2+} influx: effect of ω-conotoxin 49
Calcium: effect upon GABA release 439
involvement in effect of diphenylhydantoin 353
Calmodulin: interaction with synaptic membranes 455
Calmodulin receptors 455
Calpain: effect on transport of proteins 373
c-AMP: generated in neurotransmission 387
inhibition of phosphorylation 30
c-AMP dependent protein kinase: in neurones and astrocytes 25
CANP: extraction from myelin 11
Cardiovascular actions: of adenosine 255
Cation pump: 244
Cholecystokinin: action of dopaminergic agents 467
in human striatum and subcortical structures 167
Cholecystokinin-like peptides: in pig CNS 505
novel type 505
Cholesterol: rat brain 208
Choline acetyltransferase: in ageing rats 483
in visual cortex 341
Choline transport: in insects 217
Cholinergic markers: in brain 337
Cholinergic nerves: in visual cortex 337
Cholinergic neurones: RNA translation 185
Cholinergic transmission: work with electric organs 275
Cloning: of β-amyloid peptide 165
Cognition: involvement of adenosine 255
Co-localization: of neurotensin and dopamine 114
ω-Conotoxin GVIA: effect on acetylcholine release 49
effect on Ca^{2+} influx 49
inhibitor of voltage sensitive calcium channels 49
Conus venom: interaction with α_2-receptors 413
Convulsant: 3-mercaptopropionic acid 331
Culture: of astrocytes 25
of hypothalamus cells 35
of mouse striatal neurones 25
Cytoskeleton: in axonal transport 293

Diabetes: effect on brain glycogen 19
D-1 dopamine receptors: effect of reserpine 61
D-2 dopamine receptors: effect of reserpine 61
Differentiation 1
Diphenylhydantoin: effect of glial cells 353
inhibits glial cell growth 353
Dopamine: co-localization with neurotensin 114
diurnal rhythm in retina 399
interaction with melatonin 397
modulation by neurotensin 111
Dopamine receptors: linked to c-AMP formation 388
Dopaminergic agents: actions in cholecystokinin 467
Dopaminergic pathways 111

Electric organs: and cholinergic transmission 275
work by Aristotle to Bernstein 275
Electromotor synapse 278
Epilepsy: and adenosine 253

Excitatory amino acids: effect on GABA release 408
Excitatory amino acid receptors: in retina 407

Fast transport: of proteins 373
Fast transport models 291
FMRF amide: sequence homology with morphine modulatory peptides 477

GABA: endogenous release 439
GABA release: effect of excitatory amino acids 408
involvement of calcium 439
$GABA_B$ receptors: 85
coupling with adenylate cyclase 85
Gangliosides: in developing brain 347
in rat brain 208
Gastrointestinal tract: proenkephalin A proteins 129
Genetic spongiform encephalopathy rats 207
Glial cell growth: effect of anticonvulsant 353
Glial cells: effect of diphenylhydantoin on growth and morphology 353
uptake of taurine 193
[^{3}H]glutamate binding: to insect CNS 471
Glycogen: in brain following anaesthesia 19
in brain following diabetes 19
in brain following starvation 19
in mammalian brains 19
Glycogen hydrolysis: by adenosine 419
Glycoprotein synthesis: in memory 299
Glutamine synthetase: assay method 491
HPLC 491
Guanine nucleotides: effect on phosphoinositide hydrolysis 43

Hemicholinium-3: binding in insect CNS 211
Hemicholinium-3: in insect CNS 211
[^{3}H]hemicholinium binding: in visual cortex 341
High affinity choline transport: blocked by monoclonal antibodies 217
Hippocampus: presence of neurotensin neurones 143
somatostatin-14 immunoreactivity 153
Hirschsprung's disease: neuropeptides in colon 135
Histamine: effect on metabolism of phosphoinositides 73
effects on formation of inositol phosphates 75
Homeostatic mediator: adenosine 257
HPLC: of glutamine synthetase 491
5-HT receptors: effect of LSD 497
suntypes 497
Hydroxyindole-*O*-methyltransferase: diurnal rhythm in retina 399
Hypothalamic cells: in culture 35
thyroliberin biosynthesis 35
Hypoxic cerebral cortex: purine release 91

Immunity: and adenosine 256
Inferior oliver: neurotensin immunoreactivity 159
Inflammation: and adenosine 256
Inositol phosphates: effect of histamine 75
Insect CNS: binding of [^{3}H]glutamate 471
hemicholinium-3 binding 211
Insects: localization of choline transport sites by immunocytochemistry 217
Interactions: between dopamine and neurotensin 112
Ions: their effect in amino acid uptake 235

LF-14 = 3,3-dimethyl-1(4-amino-3-pyridil) urea
LF-14: effect on acetylcholinesterase and acetylcholine release 433
Lipids: in brains of Zitter rats 207
Liposomes: incorporation of nicotinic receptors 65
Locus coeruleus: induction of tyrosine hydroxylase 199
Long-term memory 299, 301
LSD: agonist and antagonist at 5-HT receptors 497

Malic dehydrogenase: induction by 3,5,3′-triiodothryonine 461
Malignant melanoma: role of pineal gland 265
MAO: antisera of cytosolic form 321
cytosolic form 321
MBP: degradation by CANP 11
Melanoma: role of pineal gland 265
Melatonin: in serum 267
interaction with dopamine 397
in the retina 397
Memory: 1
biochemical studies 300
glycoprotein synthesis and postsynaptic remodelling 299
human brain 309
synaptic morphology 303
the chick model 301
3-Mercaptopropionic acid: a convulsant 331
Met-enkephalin: in atrophied striatum 175
Met-enkephalin immunoreactivity: in aganglionic colon 135
Monoamine oxidase: see MAO
Monoclonal antibodies: against choline transport 217
inhibit high affinity choline transport 217
Morphine modulatory peptides: common sequence to FMRF amide 477
Morphine modulatory proteins: in spinal cord and brain 477
Muscarinic binding: in ageing rats 483
Muscarinic receptors: interaction with amitriptyline 447
Myelin basic protein (MBP) 11
Myelin calcium activated neutral protease (CANP) 11

NADP dependent malic dehydrogenase: in fish brain 461
Nerve Growth Factor 1
Neuraminidase: in developing brain 347
Neurofibrillary tangles: Alzheimer's disease 121
ubiquitin immunoreactivity 121
Neuromedin N: neurotensin-like peptide 115
Neuromodulator: adenosine 249
Neurones: c-AMP dependent protein kinase 25
Neuropeptide Y: in aganglionic colon 135
Neurotensin: co-localization with dopamine 114
immunoreactivity in human hippocampus 143
in inferior oliver 159
modulation of dopamine 111
Neurotensin-like peptide: neuromedin N 115
NG108-15 cells: effect of histamine on polyphosphoinositide metabolism 73
Nicotinic receptor: incorporation into liposomes 65
5′-Nucleotidase: and brain seizures 331
5′-Nucleotidase activity: effect of 3-mercaptopropionic 331
Nucleus accumbens: heterogeneity 467

Oncogenes 1
Oxypurinol: effect on purine release 91

Paired helical filaments: PHF 121
PEG precipitation procedure 65
Phaclofen: antagonist of $GABA_B$ receptors 85
effect on $GABA_B$ receptors 85
PHF: see paired helical filaments 121
Phorbol esters: effect on phosphoinositide metabolism 423
Phosphoinositide breakdown: effect of acoustic stimulation 327
in cochlea 327
Phosphoinositide hydrolysis: activation by guanine nucleotides 43
activation by sodium fluoride 43
in cortical slices 43
Phosphoinositide metabolism: effect of histamine 73
effect of phorbol esters 423
effect of PKC activation 423
in NG108-15 cells 73
in retinal cells 423
Phosphoprotein B-50 361
Phosphoprotein B-50: substrate for PKC 361
Phosphorylation: inhibition by c-AMP 30
in neurones and astrocytes 25
subcellular distribution in neurones and astrocytes 25
Physostigmine: effect on acetylcholinesterase and acetylcholine release 433
Pineal gland: in malignant melanoma 265
PKC: activation 423
phosphoprotein B-50 is a substrate 361
PKC activation: effect on phosphoinositide metabolism 423
PKC phosphosite(s): in phosphoprotein B-50 361
Postsynaptic remodelling: in memory 299
Potassium: transport 243
Proenkephalin A: in infant gastrointestinal tract 129
Proenkephalin A associated peptides 129
Protein kinase C (PKC): see PKC 1
Purine release: from hypoxic CNS 91
[^{3}H]QNB binding: in visual cortex 341

Receptors: coupled in adenylate cyclase in the retina 387
for calmodulin 455
to excitatory amino acids 407
Release: of purines 91
Renal effects: of adenosine 256
Reserpine: effect on dopamine receptors 61
induction of tyrosine hydroxylase 199
Respiration: and adenosine 255
Retina: α_2-adrenergic receptors 413
and melatonin 397
glycogen hydrolysis 419
receptors coupled to adenylate cyclase 387
Retinal cells: phosphoinositide metabolism 423
RNA translation: in cholinergic neurones 185

Seizures: 5′-nucleotidase activity in brain 331
Serotonin-N-acetyltransferase: diurnal rhythm in retina 339
Slow transport models 291
Sodium: transport 243
Na, K-ATPase: characteristics 245
Sodium fluoride: effect on phosphoinositide hydrolysis 43
Somatostatin-14: in hippocampus 153
Starvation: effect on brain glycogen 19
Striatum: atrophied from demented patient 175
distribution of cholecystokinin immunoreactivity 167
substance P and met-enkaphalin 175
Subcortical structures: distribution of cholecystokinin immunoreactivity 167
Substance P: in atrophied striatum 175
Substance P immunoreactivity: in aganglionic colon 135
Sympathetic ganglia: uptake of taurine 193
Synaptic changes: involvement of ATP and adenosine derivatives 309
Synaptic membranes: interaction with calmodulin 455
Synaptic morphology: and memory 303
Synaptic plasticity 314
Synaptosomes: binding of taurine 79
release of taurine 80

Taurine: binding to brain synaptosomes 79
release from synaptosomes 80
uptake by glial cells 193
uptake by sympathetic ganglia 193
THA = tetrahydroaminoacridine
THA: effect on acetylcholinesterase and acetylcholine release 433
Thyroliberin: biosynthesis in hypothalamic cells 35
synthesis in cells in serum-free medium 35
Torpedo mermorata: RNA translation in neurones 185
Transmitter release: in retina 407
Transport: of sodium and potassium 243
slow and fast axonal flow 291
Transport of proteins: effect of calpain 373
3,5,3′-Triiodothyronine: effect on malic dehydrogenase 461
Tyrosine hydroxylase: effect of reserpine 199
induction 199
in locus coeruleus and adrenals 199
Ubiquitin immunoreactivity: in neurofibrillary tangles 121

Uptake: of amino acids 235
of taurine 193

Vasoactive intestinal peptide immunoreactivity: in aganglionic colon 135
VIP receptors: linked to c-AMP formation 389
Visual cortex: laminar distribution of cholinergic markers 337

Xanthine oxidase inhibitors: effect on purine release 91

Zitter rats: lipids of brain 207

PRINTED IN GREAT BRITAIN BY BPCC WHEATONS LTD, EXETER
